

Non-Refillable Cylinders

Non-Refillable (disposable) cylinders are available for most gas mixtures. We produce simple binary mixtures through to complex multiple component mixes including multi-hydrocarbons.

Corrosive gases such as CL₂, H₂S, HCN, HCL, NH₃, NO, NO₂, SO₂ are available along with a full range non corrosive mixtures such as CO, CO₂, N₂, refrigerants, hydrocarbon mixtures and many others.

Mixtures are available in ppm, LEL or % volume units of measure.

CAC
GAS INSTRUMENTATION

Providing Unique Calibration Gas Solutions for Industry & Mining

The 112 Litre Solution

- Lowest Cost per Litre
- Reduces Purchasing Frequency
- Reduces Shipping Costs
- Reduced Waste Helps the Environment
- Improves Technician Efficiency
