

# MP-Platform Scale

Made to Perform | Made to Weigh | Made to Last

MP series scales are floor standing platform scales. The indicator, mounted on a Stainless Steel pillar, has a large and easy to read 2" display. With capacities from 60kg to 600kg, these scales are designed to perform routine weighing operations with speed and precision. All MP series scales work on Mains and on built-in rechargeable battery.

The base is designed to take the shocks and rough handling of everyday industrial weighing. The platform sits on large rubber shock absorbing pads mounted on the heavy duty base.

The pillar-mounted indicator can be removed for remote operation.

## Features

MI-101 Indicator

Kg and lb unit conversion

Large LCD Display

LED Backlit

7 Keys Keypad

Check weighing to preset weight

Basic parts counting

Memory accumulation

Internal rechargeable battery

Upto 24 Hours Backup

Tare function

Up to 15,000 External Divisions

500,000 Internal Counts

Auto Power Off

Net Gross Shift Key

Sigma Delta ADC Conversion

ADC Update 100ms

AC Power adaptor

Indicator with ABS body

Auto Zero Tracking

Gravity Compensation

Options:

RS-232

Model and size	Platform Length (mm)	Platform Width (mm)	Scale Height (mm)	Capacity and Resolution
MP4252	420	520	800	60kg*0.005kg 150kg*0.010kg 300kg*0.020kg
MP4660	460	600	800	60kg*0.005kg 150kg*0.010kg 300kg*0.020kg
