

Flanged Chamber

External Mount, Pressure to 450 psig (31 bar) and Temperature to 500°F (260°C), Minimum Specific Gravity 0.40, Hermetically Sealed Switches

Series 1213 has one vertical and one horizontal flanged connec-tion (1" RF forged steel ANSI specifications) Flange centerline 14¹/₄" (362 mm). Other centerlines available

Series 1211 is installed with one horizontal and one vertical NPT combination hub. socket weld optional.

"A" is the level at which single (or lower stage) operates on level rise.

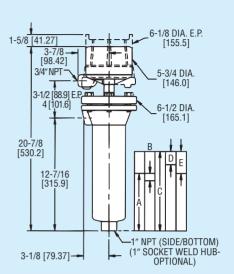

"B" is the operating differential single (or lower stage) drop in level to restore switch to original position.

"C" is the level at which the upper stage operates on level

"D" is the operating differential of upper stage - drop in level to restore switch to posi-

"E" - the increase in level above "A" to operate upper stage.

Repeatability $\pm 1/4''$ (6.4 mm)

Series 1214 provides two vertical flanged connections (1" forged steel ANS specifications). Flange centerline 15⁷/₈" (403 mm). Other centerlines available.

^{*&}quot;A" is not adjustable.

Low minimum specific gravity of 0.40 and rugged flanged chamber for inspection purposes helps insure superior long term performance. Control can be used at maximum process pressure of 450 psig (31 bar) at 100°F (38°C), and 300 psig (21 bar) at 500°F (260°C). Standard 1" NPT connections are provided for mounting. 1" socket weld hubs or 1" flanges are available as options. Hermetically sealed snap switch or mercury switches are provided in a variety of circuit configurations such as (SPST) (SPDT) or (DPDT). High or low DC applications can also be accommodated. General purpose, (weatherproof) (explosion-proof) (explosion-proof vapor proof) enclosures are provided.

APPLICATIONS

Oil refineries, chemical plants, power generating stations, pumping stations, heat transfer systems, sanitary/waste water facilities, drip legs, hydraulic systems, boilers.

SPECIFICATIONS

C1-40: Minimum specific gravity 0.40. Process pressure 450 psig (31 bar) at 100°F (38°C), 300 psig (21 bar) at 500°F (260°C).

Switch Type: Snap action or mercury: See charts A and B.

Electrical Rating: See charts A and B.

Wiring Connections: G, WT or E enclosure, terminal block. EV enclosure, 18" (460 mm) leads.

Process Connections: 1" NPT or flanges. See model chart. (1" socket

Enclosures: G, painted steel and aluminum. WT, painted steel, aluminum and neoprene. E, aluminum. EV, aluminum, neoprene.

Wetted Parts: C1 construction. Chamber, carbon steel. Trim 303SS, 304SS, and 430SS (316SS and 430SS optional).

Weight: 1211, 34 lb (15.5 kg); 1213, 44 lb (20 kg); 1214, 47 lb (21.4 kg).

Suggested Specifications

Liquid level control shall be 1211 (1213) (1214) Series with flanged carbon steel chamber. Process connections shall be 1" NPT (socket weld hub) (flanged). Unit shall be suitable for operation at 450 psi (31 bar) and 100°F (38°C), 300 psi (21 bar) and 500°F (260°C) with a minimum specific gravity of 0.40. Switch mechanism shall be gravity return and shall be activated by a stainless steel float. Circuit shall be (hermetically sealed) snap action (mercury) switch, (SPST) (SPDT) (DPDT). Enclosure shall be general purpose (weatherproof) (explosionproof) (explosion-proof - vapor proof).
