Additel 222A Multifunction Process Calibrator

- Sourcing, simulating and measuring pressure, temperature and electrical signals
- Smartphone-like menu and interface make the operation simple
- The internal cold junction compensation sensor can be re-calibrated at ice point by users
- Ultra-compact, 3.9" x 7.6" x 2.0", and 1.6 lb (0.7 kg)

OVERVIEW

A highly integrated multifunction calibrator featuring several patented technologies. The 222A is an ultra-compact, rugged, and easy to use hand-held device for sourcing, simulating and measuring pressure, temperature, and electrical signals. Its smartphone-like menu and interface make the operation simple. The 222A is ideal for calibrating, maintaining, and troubleshooting process instrumentation. Automation and documentation capabilities make the 222A a turnkey solution.

FEATURES

 Sourcing, simulating and measuring pressure, temperature and electrical signals

Sources and measures mV, mA, ohms, RTDs,

thermocouples, frequency, and pulses

Simulates and measures 13 thermocouples, 11RTDs, and pressure to calibrate transmitters

Measures and sources pressure using Additel 160A series Intelligent Digital Pressure Modules from -15 psi to 10,000 psi (-1 bar to 700 bar)

24V loop power supply

Simultaneous dual reading capability Automatic switch test

Supports square root transmitter

Pulse frequency output for the calibration of flow totalizer **Easy to use**

Smartphone-like menu and interface make the operation simpler and easier

Ultra-compact, size 3.9" x 7.6" x 2.0" (100mm x 192mm x 52mm), and weight 1.6 lb (0.7 kg)

One hand operation

Calibrated cold junction compensation (Patented) Cold junction equivalent block in the calibrator A calibrated PRT element with flexible leads is installed in the equivalent block for thermocouple cold junction compensation

This PRT element can be pulled out from the calibrator and re-calibrated and corrected at ice point by users

- Built-in temperature readout CVD coefficients of a calibrated PRT can be input into the calibrator for accurate temperature measurement.
- Multi lingual interface
 English, German, French, Italian, Spanish, Portuguese,
 Simplified Chinese(Traditional Chinese, Japanese and
 Russian are available per request)

- Documenting and automated procedure capability
 Manage the information of the device under test
 Set up automated calibration procedures, and the
 Additel 222A performs the test, calculates the errors,
 displays and/or stores the results in the memory, and
 highlights the out-of-tolerance points.
 As-found and As-left functions allow recording and
 documenting results for quality control.
 Download tasks and upload the results
 Snapshots allow you to capture and save work.
- Build-in unit conversion tool Build-in converters for pressure units, temperature units, temperature vs. resistance (RTDs), and temperature vs. millivolt (thermocouples)
- Display

3.5 inch TFT color screen

Rugged

Rugged design for harsh environments. Passed a 1-meter drop test Three year warranty for the ADT222A, and one year for the battery pack

Misuse protection

Up to 30V voltage on any two sockets and up to 1A current on current sockets will not damage the calibrator. The calibrator will return to normal condition as soon as the voltage or current is removed.

Rechargeable battery Rechargeable Li-ion battery for 15 hours uninterrupted use.

Battery life will be reduced when 24V is applied The rechargeable battery is replaceable.

- NIST Traceable Calibration with data
- Warranty: 3 years

Corporate Headquarters

22865 Savi Ranch Parkway Ste F Yorba Linda, CA 92887, USA Salt Lake City Office 802 Bamberger Dr, Suite C American Fork, UT 84003, USA

APPLICATIONS

The 222A multifunction calibrator is a process tool for measuring, sourcing and simulating mA, mV, V, RTDs, thermocouples, ohms, frequency, pulses and pressure, captures switch values and provides 24 V loop power.

Electrical

Resistance measurement / simulation Voltage measurement / generation Current measurement / generation Frequency measurement / generation Pulse counting/generation 24 VDC loop supply Switch sensing

Safety Specifications

The 160A series Intelligent Digital Pressure Modules are available for gauge, vacuum and absolute pressure from -15 psi to 10,000 psi (-1 bar to 700 bar). Accuracy from 0.02% FS includes operation over 14°F to 122°F (-10°C to 50°C), one year stability and calibration uncertainty. For detail specification refer to pressure modules datasheet.
