DESCRIPTION

IVC-222HP11 Current/Voltage Calibrator

Cal Lab accuracy in a Hand Held Calibrator

The all new IVC-222HP11 is a general purpose current and voltage source that can be used in engineering, manufacturing; test and process control applications. It combines the latest digital and analog circuitry to achieve it's rated specifications in a small, reliable package.

The unit has the capability to store and recall up to two values in the setpoints provided by the SP1 and SP2 keys.

The IVC-222HP11 has a RS-232 port which can be accessed via a custom cable available from Martel allowing the unit to be computer controlled for automated testing.

The unit can be powered in the field by alkaline or rechargeable batteries or on the bench with optional AC adapter.

Applications:

- Test and calibrate analog measuring equipment
- Calibrate process control (4-20mA) devices
- Simulate low level DC voltages to mimic sensor outputs
- Test analog to digital converters
