The **MOBILE METER[®]** Software Test Instrument App converts Android[®] and iOS[®] based phones and tablets into a multi-function test instrument. Wireless probes connect to the phone or tablet using our mobile gateway, Model UHH-BTG, which utilizes wireless technology from Bluetooth SIG Inc. Parameters from multiple probes can be displayed simultaneously, or a single probes parameters can be displayed as a meter or analog gauge.

FEATURES/BENEFITS

- Available on Android[®] and iOS[®] devices
- Data logging feature records measurements from a single probe and can email reports directly from device
- Display multiple parameters in gauge or meter display

APPLICATIONS

- Building balancing
- Building commissioning
- Testing HVAC equipment performance
