## Specifications - Installation and Operating Instructions

The Series DPT Digital Pressure Transmitter with Switches combines a large, 14 -segment LED display with two programmable solid state switches into one compact unit. A unique, 3-way rotating design allows the DPT to meet specific installation requirements without any retrofitting. The display and electrical connection can be rotated independently to maximize visibility while still orienting the electrical connection in the best position for the cable connector. Large, ergonomically designed push buttons allow for quick/easy programming and thinfilm piezoresitive sensor technology guarantees long-term reliability and stability.

## INSTALLATION

When installing gage always use a hex at the base of the housing to tighten the gage to a mating fitting. Do not apply wrench to housing.

## POWER UP

| 4-digit LED display | - Display system pressure |
| :--- | :--- |
|  | - Display Menu Item |
| 1. LED (red) | - Display Parameter |
| 2. LED (red) | - Status Switch Output 1 |
| Operating Modes | - Status Switch Output 2 (Optional) |
| System start | - Display is fully activated for 2s <br>  <br> -When the pressure switch is powered up within <br> the range of the hysteresis, the output switch is <br> set to "not active" by default |
| Display Mode | - Normal operation, displays system pressure |
| Programming Mode | - Setting Parameters |

## SPECIFICATIONS

Service: Compatible gases, liquids or vapors
Wetted Materials:
Pressure connection: 316 L SS;
Pressure sensor: 316 L SS (13-8 PH for ranges above 150 psi ).
Housing: 316 L SS lower body, heat and chemical resistant fiberglass reinforced plastic (PBT) plastic head, TPE-E keyboard, PC display window.
Accuracy: 1.0\% F.S. (includes non-linearity, hysteresis, zero point).
Pressure Limit: See table.
Temperature Limits: 32 to $176^{\circ} \mathrm{F}\left(0\right.$ to $\left.80^{\circ} \mathrm{C}\right)$.
Process Connections: $1 / 4^{\prime \prime}$ male NPT.
Display: Red LED 4-digit ( $0.35^{\prime \prime} \mathrm{H}$ digits).
Weight: 7 oz ( 0.2 kg ).

## SWITCH SPECIFICATIONS

Switch Type: PNP.
Electrical Rating: 250 mA .
Electrical Connections: M $12 \times 1,5$-pin.
Mounting Orientation: Mount in any position.
TRANSMITTER SPECIFICATIONS
Temperature Limits: 32 to $176^{\circ} \mathrm{F}\left(0\right.$ to $\left.80^{\circ} \mathrm{C}\right)$.
Thermal Effect: 0.2\% FS / 10k.
Power Requirements: 15 to 35 VDC.
Output Signal: DPT-A: 4 to 20 mA ; DPT-V: 0 to 10 VDC.
Loop Resistance: DPT-A: $\leq 0.5 \mathrm{k} ;$ DPT-V: $>10 \mathrm{k}$.
Power Consumption: $\leq 100 \mathrm{~mA}$.
Electrical Connections: M 12×1, 5-pin.
Enclosure Rating: IP65 and IP67.
Agency Approvals: CE.

## UNITS CHART

|  |  |  |  |  | Pressure Ranges |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Model |  | $\begin{array}{\|l} \hline \begin{array}{l} \text { Range } \\ \text { (psig) } \end{array} \\ \hline \end{array}$ | Maximum Pressure (psig) | Burst Pressure (psig) | bar | MPa | kPa | $\mathrm{kg} / \mathrm{cm}^{2}$ |
| DPT-V00 | DPT-A00 | -14.5 to 0 | 30 | 75 | 1.034 | . 1034 | 103.4 | 1.055 |
| DPT-V01 | DPT-A01 | 0 to 15 | 30 | 75 | 1.034 | . 1034 | 103.4 | 1.055 |
| DPT-V02 | DPT-A02 | 0 to 25 | 60 | 150 | 1.724 | . 1724 | 172.4 | 1.758 |

WIRING

PROGRAMMING

|  | Display-Mode | Programming-Mode |
| :---: | :---: | :---: |
|  | short press: <br> Display units <br> long press: <br> Run-through Parameter Info <br> 1. UNIT + unit <br> 2. SP1 / FH1 + value <br> 3. RP1 / FL1 + value <br> 4. SP2 / FH2 + value (optional) <br> 5. RP2 / FL2 + value (optional) <br> 6. LOW + value <br> 7. HIGH + value <br> 8. TAG + value (Only display when value set) | short press: <br> - Menu up <br> - Increase parameter value <br> long press: <br> - Menu up <br> - Increase parameter value |
|  | short press: <br> Display units <br> Iong press: <br> Switch to Programming Mode If the password is set to <> 0000, a pass word will be requested. If authentication is successful, then it enters the Program Mode, otherwise it reverts to Display Mode. | short press: <br> - Menu down <br> - Decrease parameter value <br> long press: <br> - Menu down <br> - Decrease parameter value (Increment rate is time dependent) <br> Iong press (during Restart, keep pressed) |
| $18$ | short press: Display units | short press: <br> - Select Menu Item <br> - Confirmation of the entry (Parameter value) |
|  |  | short press (both keys at the same time): Return to Display Mode |

## SWITCH FUNCTION

Hysteresis function
If the system pressure fluctuates around the nominal value, the hysteresis keeps the switch status of the outputs stable. When the system pressure is rising, the output switches when it reaches the respective set point (SP); if the pressure falls again, the output switches back only if the reset point (RP) is reached.
Application example: loading an accumulator
The shut-off valve loads up to 80 bar and then shuts off. When 70 bar is reached again, it switches on once more.

## Window function

The window function allows the monitoring of a defined range. If the system pressure is between the window high ( FH ) and the window low (FL), the output is activated (NO) respective deactivated (NC).
Delay times ( 0.00 to 50 s ):
By this means unwanted pressure peaks of short duration or high frequency can be filtered out.

The pressure must remain for at least this time to enable the switch to operate. The switching output does not immediately change its status when it reaches the switching event, but only after the delay time has elapsed. If the switching event no longer pertains when the delay time has elapsed, the switching output does not change.

ERROR
Acknowledgement of an Error Display by pressing the "Enter" key.

| Error Display | Description |
| :--- | :--- |
| ATT1 | On changing the Switch Point the system automatically reduces the Reset Point |
| ATT2 | Zero Point adjustment error, current pressure is outside the limits |
| ATT3 | Password entered for Menu access is incorrect |
| ERR | Internal error |
| OL | Overpressure, measuring range exceeded > approx. 5\% (Display blinks) |
| UL | Underpressure, under measuring range < approx. 5\% (Display blinks) |

PARAMETERS

| Parameter | Description |
| :--- | :--- |
| SP1 / SP2 | Hysteresis function: Switch point switch output (1 or 2) |
| FH1 / FH2 | Window function: Window high switch output (1 or 2) |
| RP1 / RP2 | Hysteresis function: Reset point switch output (1 or 2) |
| FL1 / FL2 | Window function: Window low switch output (1 or 2) |
| EF | Enhanced Programming Functions |
| RES | Return the set parameter to the Factory Settings <br> Switch Delay Time, which must occur without interruption before any electrical signal change occurs <br> (SP1 or SP2) |
| DS1 | Switch Delay Time, which must occur without interruption before any electrical signal change occurs <br> (RP1 or RP2) |
| DR1 | Switching Function Switching Output (1 or 2) |
| DR2 | HNO = Hysteresis Function, normally open <br> HNC = Hysteresis Function, normally closed <br> FNO = Window Function, normally open <br> FNC = Window Function, normally closed |
| OU1 | Changing Units <br> (If the pressure range is higher than the display range, no change of the unit is posssible <br> and the parameter UNIT is not shown) |
| OU2 | Zero Point adjustment (+ 3\% of Nominal Pressure) |

TROUBLESHOOTING

| Failure | Possible cause | Procedure |
| :--- | :--- | :--- |
| No output signal | Cable break | Check connections and cable |
| No output signal | No/incorrect voltage supply | Adjust the voltage supply to correspond <br> with the Operating Instructions |
| No/False output signal | Mechanical overload through over pressure | Follow pin assignment (see Instrument <br> Label / Operating Instructions) |
| Output signal unchanged after change in pressure | Replace instrument; if failure reoccurs, <br> consult the manufacturer |  |
| Abnormal zero point signal | Overload limits exceeded | Ensure permissible overload limits are <br> observed (see Operating Instructions) |
| Signal span too small | Power supply too high/too low | Replace instrument; if failure reoccurs, <br> consult the manufacturer |
| Signal span too small |  | Correct the power supply in line with <br> the Operating Instructions |

## WARRANTY

Upon final installation, no routine maintenance is required. A periodic check of the calibration is recommended. The series DPT is not field serviceable and should be returned if repair is needed (field repair should not be attempted and may void warranty). Be sure to include a brief description of the problem plus any relevant application notes. Contact customer service to receive a returns goods authorization number before shipping.
